Bell County Property Assessed Clean Energy (PACE) Program Report

The Bell County Commissioners Court approved a resolution of intent to establish a PACE program on Monday, August 19, 2019. The Property Assessed Clean Energy (PACE) program is an innovative financing tool that enables owners of commercial, industrial, and multi-family residential properties to obtain low-cost, long-term loans for water conservation, energy-efficient, and renewable energy projects. This program has been found to increase property values, encourage business retention and expansion, update aging building stock, and increase the environment efficiency of facilities in the community.
